

Project Manager (m/w/d)

NDT Global is the leading provider of ultra-high-tech diagnostic inspection solutions, advanced data analysis and integrity assessment services for ensuring the safety and longevity of energy-sector infrastructure assets. Recognized as the forerunner in ultrasonic inspection technologies comprising Pulse Echo, Pitch-and-Catch and Phased Array, as well as Acoustic Resonance (ART Scan) methodologies, the company also deploys a range of non-ultrasonic technologies, such as Inertial Measurement Units, with more under development. NDT Global strategically applies its inspection technologies to detect, diagnose and model various types of threat—circumferential or axial cracks, metal loss, geometry, mapping, and more—across diverse classes of assets. By providing predictive, decision-ready insights driven by the world's most accurate data, NDT Global enables the conditions for asset owners to optimize infrastructure health and drive operational efficiencies while reducing risk and minimizing their carbon footprint.

Your Tasks

The goal of the Project Manager is to drive small and medium scale projects – for example electronic modules, sensor carrier or test equipment – for internal and external customer development projects in order to achieve project milestones in time, good quality and within budget.

Responsibilities

- Manages and controls projects, including provision of forecast and regular reporting
- Plans projects, including structure plans, task descriptions, and resource allocation
- Evaluates time and costs, including Capex- / Research Request preparation
- Closes out projects, including handover to Finance and customer with full documentation
- Communicates with internal and external customers and fosters interdisciplinary exchange and communication
- Coordinates and motivates project team

Requirements

- An Associated degree in Electrical Engineering, Mechanical Engineering or related education is required
- A Project Manager Certification is preferred
- A minimum of 3 years of experience in Project Management is required
- Must be proficient in spoken and written English
- Advanced knowledge of Microsoft Office (Word, Excel, PowerPoint, Outlook, and MS-Project)
- Advanced knowledge of Enterprise Resource Planning System

Benefits

- Great long-term career prospects and development opportunities
- Challenging tasks in innovative and diverse teams
- Attractive compensation system
- Flexible working environment
